

BOXX Offers Wacom® Intuos® 4 Professional Pen Tablet

AUSTIN, TEXAS, January 5th, 2010—BOXX Technologies, an innovator in high-performance computing systems for visual effects (VFX), post production, graphic design, and advanced visualization, today announced that it has added the newly redesigned Wacom® Intuos®4 Professional Pen Tablet to its line of workstation accessories. Wacom is an industry leading producer of pen tablets favored by artists, designers, and a broad range of professionals working in other industries.

“Intuos4 allows artists and designers to work pen in hand, naturally and intuitively, but with the benefits of a digital workflow,” said Jim McCartney, Wacom’s Vice President of Sales. “BOXX really understands creative workflows, so an Intuos4 supported by a 3DBOXX hardware platform provides a high performance solution that will truly accelerate production time—and that’s essential to our creative community.”

In redesigning the intuitive Intuos4, Wacom consulted the professional creative community and considered workflow, software integration points, and the demand for both performance and comfort. The result is a re-engineered pen tablet shape and surface that enable ergonomic, consistent strokes over long periods of usage. In addition, the Intuos4’s new pen with Wacom Tip Sensor technology captures the slightest nuance of pen pressure against the tablet surface and boasts 2048 levels of pressure sensitivity for easy and precise brush size, line weight and opacity adjustments. The Intuos4 is also available in four different wide-format sizes (S, M, L, and XL) to accommodate users’ specific working style and workflow requirements.

“The Intuos4 is the gold standard pen tablet favored by the same creative professionals who rely on our record-setting 3DBOXX workstations and renderBOXX rendering systems,” said Shoaib Mohammad, Director of Marketing and Business Development at BOXX. “We provide complete solutions for digital artists, animators, and industrial designers that meet the needs of their workflows, so a top-of-the-line, professional-grade accessory like Intuos4 is what BOXX customers have come to expect.”
